Safety Confirmation System

The Safety Confirmation System helps to confirm and ensure each student's safety, communicate information, and to provide necessary supports in the event of a large-scale disaster.

- **If an earthquake has a scale of 6 or higher in your area, the system will automatically send a safety confirmation email**.

- Headquarters for disaster control at Sophia or offices in charge may send messages to specific users (e.g., only students with the ability to commute) manually through this system.

- Safety confirmation of family members- You can exchange messages among family members in the system if you register them (No involvement by Sophia).
  ※ Initial settings by users are necessary.
    This will be announced on My Sophia's University Bulletin Board.
    (Search for "Safety Confirmation", then check the article on initial settings.)
