

## Job Announcement

The Graduate School of Global Environmental Studies, Sophia University is seeking candidates for a full-time faculty position.

I. Expected research field: Environmental Economics and Ecological Economics

II. Information:

A successful applicant is required to conduct systematic teaching of environmental economics. In addition, we will recruit an applicant who has high expertise in research activities and can handle advanced graduate education. Education from a multidisciplinary perspective is essential for nurturing human resources who can understand and address environmental issues. In this recruitment, we seek a faculty member with environmental economics or ecological economics background who can promote both research and education and be instrumental in solving actual environmental issues such as climate change, waste management, and conservation of natural environment.

In this recruitment, we seek a faculty member who can promote education and progress researches through cooperation with researchers in other areas of environmental science.

In addition, the Graduate School of Global Environmental Studies has an international course (English course) which allows students to conduct their studies and obtain a degree only in English in order to develop human resources with rich international insights, and provides education in the English environment that contributes to the improvement of internationality. A faculty member with the ability that could contribute to this line of education is desired.

\*Scope of Change: The duties determined by the Sophia School Corporation
