多彩な研究活動を推進・支援

研究推進センターは、本学研究力の強化及び組織的研究の推進を目指すとともに、研究の多様性や萌芽的研究の重要性も尊重し、本学教員と若手研究者（大学院生を含む）の研究活動を支援し、研究成果を広く社会に公表・還元することを目的として業務を行っています。

本センターは2014年4月より、「研究支援センター」から「研究推進センター」へ名称変更を行い、本学の研究活動の更なる発展と、社会へ向けた情報発信力の強化、産官学連携推進のための体制整備に取り組んでいます。

現在、「産官学連携チーム」と「研究支援チーム」の2チームに分かれて、外部の専門家の知見も踏まえつつ、主として以下の業務を行っています。

- 1 競争的研究資金・受託研究・学外共同研究
 - (1) 科学研究費助成事業をはじめとする競争的外部資金申請と獲得の推進・支援
 - (2) 研究助成資金申請と獲得の推進・支援
 - (3) 受託研究・学外共同研究契約締結業務
- 2 知的財産管理体制、産官学連携体制の整備と推進
 - (1) 知的財産管理の整備及び運営
 - (2) 産官学連携を円滑に実施するための環境整備と推進
- 3 上智大学研究機構による総合的な研究活動の振興支援
- 4 研究推進のための調査及び上智大学研究案内、シーズ集の公開等対外広報活動の強化
- 5 学内各種研究助成プログラムの実施
- 6 研究倫理及び不正防止にかかる取組の推進

The Center for Research Promotion & Support strives to strengthen research capabilities and promote organized research at Sophia University while maintaining an appreciation for the importance of research diversity and early-stage projects, while also providing support for the research activities of faculty members and young researchers (including graduate school students) at the University. The Center then shares the results of this research with society at large, fulfilling the mission of publicizing results and providing a return on society's contributions.

The center is changed a name from the Research Support Center to the Center for Research Promotion & Support from April, 2014 and we are actively promoting further development of research activities and strengthening of providing information to society and maintenance through the industry-government-academia collaboration system.

Currently, staff are divided into two teams—the Industry-Government-Academia Collaboration Team and the Research Support Team—who undertake the following as their primary activities while incorporating advice from outside specialists.

1. Support for applications for and management of competitive research funds, contracted research and external collaborative research
 - (1) Promotion and support for competitive external funding applications and acquisitions, including Grants-in-Aid for Scientific Research (KAKENHI)
 - (2) Support for application and acquisition of research assistance funds
 - (3) Contract work for contract research and external collaborative research
2. Preparation and promotion of intellectual property management systems and industry-government-academia collaborative arrangements
 - (1) Preparation and operation of intellectual property administration
 - (2) Support for promotion and preparation for an environment to smoothly implement industry-government-academia collaboration
3. Support for furtherance of comprehensive research activity by the Sophia Research Organization
4. Implementation of a survey to support the development of research activities, and the strengthening of public information-related efforts such as introducing research activities at Sophia University and releasing the Research Outcome Report
5. Implementing various research grant programs within the University
6. Promotion of tasks related to complying with research ethics and preventing misconduct

社会ニーズにも即応した産官学連携を推進

上智大学理工学部リエゾンオフィス(SLO: Sophia Science & Technology Liaison Office)は、社会との連携を深めながら、上智大学理工学部及び理工学研究科の教育研究活動をさらに活発化させるとともに、社会への貢献度をより一層高めるために、2001年11月に上智大学理工学振興会内に設置された産官学連携事業を目的とした組織です。リエゾンオフィスは、研究成果の単なる社会への移転だけではなく、社会的ニーズに即応するために、理工学部教員が持っている知的資源を迅速に結集する組織構成をもって運営しており、主に以下の事項に重点を置いて活動しています。

- 1 産官学連携業務: 委託研究、委託調査、共同研究、委託試験・測定、技術相談、講演・出張講義などの実施
- 2 各種企画の実施: 産学技術交流会、シンポジウム、講演会、公開講座など
- 3 教員特許の申請と事業化支援
- 4 各種イベントへの参加と教員知財の広報活動

The Sophia Science & Technology Liaison Office (SLO) in the Faculty of Science and Technology is an organization established in November 2001, within the Sophia University Science and Technology Promotion Council (Sophia Sci-Tech). The SLO was established to stimulate education and research activities in the Faculty of Science and Technology and Graduate School of Science and Technology, as well as all-around enhancement of contributions to society. The SLO does not simply transfer research results to society; rather, it serves as a vehicle to link the needs of society with research in the university, by providing information to faculty members and helping to establish links between faculty researchers and outside organizations. Activities are focused in the following areas:

- 1 Industry-government-academia linkages
The SLO facilitates contract research, collaborative research with external organizations, contract testing and measurement, technical consultation, lectures, external lectures, etc.
- 2 Implementation of various projects
Industry-academia technology exchange meetings, symposia, lecture sessions, public lectures, etc.
- 3 Support for patent applications and use of patented inventions in commercially productive ways
- 4 Participation in national and regional science and technology liaison meetings and educational activities to raise faculty members' understanding of intellectual property rights
